CORPUS OF EARLY KEYBOARD MUSIC

JOHN CALDWELL
General Editor

KEYBOARD MUSIC
OF THE
FOURTEENTH & FIFTEENTH CENTURIES

AMERICAN INSTITUTE OF MUSICOLOGY
Paul L. Ranzini
Director
The American Institute of Musicology publishes seven series of critical editions, scholarly studies, and reference works, as well as a journal, all dedicated to the study of music and culture in the Medieval, Renaissance, and early Baroque eras. The publications of the Institute are used by scholars and performers alike and constitute a major core collection of early music and theoretical writings on music.

Musica Disciplina (MD)
Corpus Mensurabilis Musicae (CMM)
Corpus of Early Keyboard Music (CEKM)
Musicological Studies and Documents (MSD)
Renaissance Manuscript Studies (RMS)
Corpus Scriptorum de Musica (CSM)
Miscellanea (MISC)

FOREWORD

The present publication, the first of a series entitled Corpus of Early Keyboard Music, contains a transcription of all known sources of keyboard music of the 14th and 15th centuries—none of an earlier date being known—with the exception of two unusually large manuscripts, the Codex Faenza and the Buxheim Organ Book. The latter has recently been published both in facsimile (B. A. Wallner, Das Buxheimer Orgelbuch, 1955) and in transcription (B. A. Wallner, Das Buxheimer Orgelbuch in Das Erbe deutscher Musik, vols. 37–39, 1958/59). The Codex Faenza will also be published separately.

Aside from these two comprehensive sources, our heritage of mediaeval keyboard music consists of a number of small manuscripts, most of them fragmentary. Some of the compositions contained in these manuscripts have been published here and there, but to collect all of them in one volume seemed to be a worthwhile undertaking.

Before turning to a brief description of the sources and some remarks about their contents, I should like to express my gratitude—shared, I am certain, by many others—to Dr. Armen Carapetyan for having taken the initiative in yet another of the many important projects that have come to life through his endeavors on behalf of musicology. My gratitude is slightly tempered by the fact that he has asked me not only to contribute several volumes to the Corpus of Early Keyboard Music but also to serve as its general editor, a function that entails a considerable amount of work, time, and responsibility. However, I am very glad to give all possible help to a project, which to me means a life-long dream come true.

Commentary

As for editorial procedures, the modern practice of an accidental being valid for an entire measure has been accepted. This practice applies particularly to the sources C to N, in which each note carries its own sign of alteration, a descending line (with or without a crossing stroke) in the staff notation of the upper part, a little loop (abbreviation for lat. -is) attached to the f, c, etc. in the letter notation of the lower parts, in which also separated signs are used for b-natural and b-flat. This means, therefore, that in No. 9, measure 5 the original has four f-sharps, which in the transcription are indicated by a single sharp placed in front of the first note.

Editorial accidentals have been used very sparingly, probably more so than many of my colleagues would deem appropriate and necessary.

In the compositions from the source A (Nos. 1–6) the note values are reduced 1:8 (brevis = quarter note), in the others, 1:4 (semibrevis = quarter note). The distribution of the voice parts is exactly as in the original, the staff notation being reproduced on the upper system, the letter notation on the lower.
A. London, Brit. Mus., add. 28550
